TestBHDCwParameters,Dee (c) 41 F 07/04/1984 Allergy/Adv: No Known Allergies (More ▾)

RSV Antigen Routine		Override *Erase
SCREENING TYPE	DESCRIPTION	SEVERITY
Order Rule	OM RSV Age Alert.5	
Rule Message	Based on the package insert and established performance characteristics, this test is only appropriate for patients under the age of 19.	

- When placing the RSV Antigen, FSED POC – RSV Antigen Screen, and ED POC RSV orders on patients > 19 years old, the user will be presented with this conflict and will be unable to place the order. This will be in place for all facilities.

MEDITECH Expense TIP SHEET

Apheresis

The Apheresis (APHERESS.C.OM) order was updated to account for a new free-text query of indication.

These changes were made in collaboration with the Corporate Service Lines and Provider Product teams

<p>The screenshot shows the 'Apheresis' form with the following fields: Stat (unchecked), Routine (checked), * New, 04/01/26, * Provider (Attending01,Provider), * Source (Department Process), * Type of procedure, * Date of procedure, * Frequency/number of treatments, Phone number, and Apheresis comment.</p>	<p>These are the previous queries for the Apheresis order</p>
<p>The screenshot shows the 'Apheresis' form with the following fields: Stat (unchecked), Routine (checked), * New, 04/01/26, * Provider (Mt,Meditech), * Source (Care Plan), * Type of procedure, * Date of procedure, * Frequency/number of treatments, Phone number, and a new 'Indication' field highlighted with a red box.</p>	<p>A new query was added called Indication – this a free text box with a 75 character limit.</p>
