Status Board

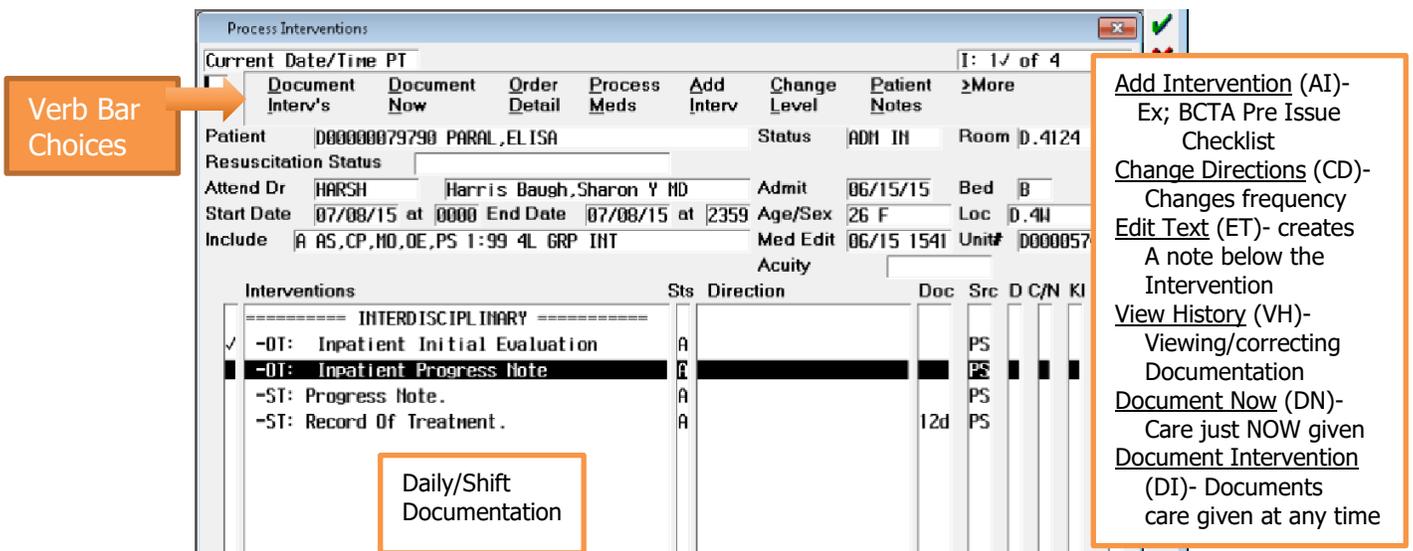

The screenshot shows the 'Nurse Status Board' window. The main table lists patients with columns for Rm/Bed, Patient Name, MD, MEWS PEWS, Visit reason, New Order ePom, and Protocol. A patient named 'PATIENT, CHART' is highlighted. On the right, a vertical menu contains options like Allergies, Admin Data, Assessment, Reconcile Rx, Process Int, PI Loc/List, Monitor, Plan of Care, Pt Notes, Discharge, eMAR, Transfusions, Orders, Ack/Ver, Review, References, E-Mail, Flowsheet, Print Report, and Variance. Orange callout boxes point to 'Shift Charting' (Process Int), 'Patient Notes' (Pt Notes), 'Orders' (Orders), 'Review' (Review), and 'Create a Patient List Or Finding a patient' (Find Patient button). On the far right, a vertical toolbar has icons for Save (checkmark), Exit (X), Lookup (magnifying glass), and Directional Keys (arrows). Text on the right explains: 'Process Int- 1 Pt Many Interventions' and 'Process Loc/List- Many Pts 1 Intervention'.

Name/Mnemonic Searches: N\ + First 3 letters of the Last Name (Dr. Smith = N\SMI)

T= Today, N= Now, T-1 – Yesterday, T+1= Tomorrow

Process Interventions- Interventions will start with your area of care e.g. OT, PT, ST, RT.

The screenshot shows the 'Process Interventions' window for patient 'PARAL, ELISA'. It displays patient details, attend doctor 'HARSH', and a list of interventions. An orange box labeled 'Verb Bar Choices' points to the 'Document Interv's' button. Another orange box labeled 'Daily/Shift Documentation' points to the '-OT: Inpatient Progress Note' intervention. A large orange box on the right lists actions: 'Add Intervention (AI)- Ex; BCTA Pre Issue Checklist', 'Change Directions (CD)- Changes frequency', 'Edit Text (ET)- creates A note below the Intervention', 'View History (VH)- Viewing/correcting Documentation', 'Document Now (DN)- Care just NOW given', and 'Document Intervention (DI)- Documents care given at any time'.
