

IPR Module

Rehab: Locomotion Preadmission Screen Tool

The existing description of the current level of function for IPR patients may misrepresent the patient's actual status and can result in inconsistent evaluation. This update removes potentially misleading text from the Yellow Information box to ensure documentation more accurately reflects the patient.

IRF Preadmission Screening

Locomotion current device: [or free text]

1 ☐ None 7 ☐ Wheelchair +

2 ☐ Cane +

3 ☐ Orthosis

4 ☐ Crutches +

5 ☐ Prosthesis

6 ☐ Walker +

Document devices actively used.

Locomotion current device: [text box]

Locomotion current level of function: [text box]

Locomotion current distance traveled without a rest break: [text box]

Description of current level of locomotion: [text box]

The description for *Locomotion current device* field has been updated to 'Document devices actively used' in the Yellow Information box.

Nursing

Rehab: IRF Preadmission Screening

Rehab: Nursing Eval and Daily Note

Currently, there is potential for inaccurate documentation and risk of reimbursement relating to Transportation for Rehab patients. This update will remove the *Transportation* field from **Nursing QRP Discharge** and modify the **Nursing QRP Admission** screen.

Nursing QRP Admission

The updated field, *Transportation*, has the following responses:

- Yes
- No
- Pt declines to respond
- Pt unable to respond

Note: 'Yes' and 'No' responses cannot be combined. 'Pt declines to respond' also cannot be combined with any other response.

Note: The Yellow information box has been updated to "In the past 12 months, has lack of reliable transportation kept you from medical appointments, meetings, work, or from getting things needed for daily living? If patient is unable to respond, follow up w/proxy and document both "unable to respond and proxy's response."

Nursing QRP Discharge

The field, *Discharge- Lack of transportation impacts access to outside activities*, has been removed.

Tube Feeding Orders

'Pediasure FBR 1.5 cal RTH' has been added to the **Pediatric Tube Feeding** formula list.

'Prosource TF' and 'Prosource TF20' have been added to both **Adult** and **Pediatric Tube Feeding Modulators**. <see below>

An "Age-Appropriate" **Error Message** has been added to 'Prosource TF' and 'Prosource TF20' that will prohibit ordering these items for patients who are under 4 years of age.

Prosource TF and Prosource TF20 are intended only for patients 4 years old and older.

Supplements

Order Rule Logic has been added to all 'Supplement' fields. If 'NPO', 'Clear liquid', 'Fundoplication clear' or 'Bariatric clear liquid' (*Adults Only*) is entered as a 'Diet Modifiers' and inappropriate supplements are selected, the following **Error Message** will display:

Any Gelatin, Magic cup or Thrive ice cream supplements are not appropriate with NPO or any Clear liquid diet modifiers.
