- Tunneled Catheter Management

MEDITECH Expanse TIP SHEET

“Pressure Injury Instance Stage 2 and More” Surveillance Indicator

A Surveillance indicator is now available for the Rehab nursing staff on the Patient Care Status Board, that brings visibility to patients who have a documented stage 2 or more pressure injury.

☒ Skin Alteration
 > Left Elbow Pressure injury
 > Add a Skin Alteration

OK

☐ Left	☐ Anterior	☐ Abdomen	☐ Abrasion
☐ Right	☐ Posterior	☐ Achilles	☐ Abscess
☐ Bilateral	☐ Lateral	☐ Ankle	☐ Amputation
	☐ Medial	☐ Anus	☐ Avulsion
	☐ Distal	☐ Arm	☐ Blister
	☐ Proximal	☐ Axilla	☐ Burn
	☐ Dorsal	☐ Back	☐ Contusion
	☐ Plantar	☐ Breast	☐ Crepitus
	☐ Circumferential	☐ Buttock	☐ Graft
	☐ Generalized	☐ Calf	☐ Incision
		☐ Cervix	☐ Laceration
		☐ Cheek	☐ Maceration
		☐ Chest	☐ Mesh
		☐ Chin	☒ Pressure injury
		☐ Clavicle	☐ Procedural site
		☐ Coccyx	☐ Puncture
		☐ Ear	☐ Rash/hives
		☐ Elbow	☐ Scratch
		☐ Eye	☐ Skin flap

For patients to qualify for the Pressure Injury Instance Stage 2 and More Surveillance indicator, a user must first document a Skin Alteration instance type for Pressure injury.

***If a pressure injury is documented without choosing the “Pressure injury” type for this instance, the patient will not qualify for the Surveillance indicator.**

Once a patient qualifies, the “Pressure Injury Instance Stage 2 and More” indicator will appear in the Detail region of the Patient Care Status Board. Displayed below the indicator title will be the date/time that the patient qualified by this documentation.

Surveillance Profile Criteria
 Surveillance, Sept 20 26 M 01/01/2000 Allergy/Adv: Not Recorded Close

Profile Qualified Instance

Pressure Injury Instance Stage 2 and More 01/27/26 09:26 1

Details

Patients with a pressure injury documented as stage 2, stage 3, stage 4, unstageable, or deep tissue injury.

Patients will drop from this profile upon discharge/departure or if the wound stage changes to stage 1.

Associated Data

Order	Result	Date	Specimen
Pressure injury risk score	16 - At risk for developing pressure injury	01/27/26 09:24	
Pressure injury present on adm	N	01/27/26 09:21	
Pressure injury staging	Stage 2	01/27/26 09:21	

Qualifying Criteria

↑ ↓ Edit Reevaluate Time

Selecting on this indicator will open the Surveillance Profile Criteria screen. Details about this indicator and any associated data will appear in this screen.

Associated Data

- Pressure injury risk score
- Braden QD score and risk level
- Pressure injury present on admission
- Pressure injury staging
