MEDITECH Expanse TIP SHEET
Bariatric Surgery – Diet Alert
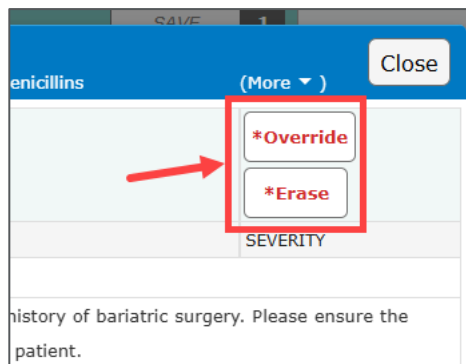

If a patient has a history of bariatric surgery, the system will now alert ordering users if they attempt to submit a diet order that is not a **Bariatric** or **NPO** diet.

This rule will trigger for the following diet order selections:

- Regular Diet
- Low Sodium Diet
- Low Fat Diet
- Clear Liquid Diet
- Consistent Carb/Diabetic Diet
- Dysphagia/IDDSI Diet
- Fiber Restricted Diet
- Full Liquid Diet
- Pediatric Diet
- Renal Diet
- Adult Tube Feeding
- Pediatric Tube Feeding

Users have the option to:

- Select **Override** to continue with the selected order.

- Select **Erase** to remove the order from the order queue.

MEDITECH Expanse TIP SHEET
Geriatric Alerts (BEERS Criteria) Protocols Verbiage Update

HCA Healthcare®

Current vs Updated Geriatric Alerts Pop Up Message (Example #1)

Confirmation

(?) This drug is a CCB ANTIHYPERTENSIVE.
This patient is classified as ELDERLY (>/=65 years old), and they are over the clinical threshold of 70 years old with this medication since their age is 70 years old.
Avoid immediate release nifedipine in the elderly due to potential for hypotension and the risk of precipitating myocardial ischemia.

To view additional information click the 'Yes' in the BEERS section below.

I have reviewed the BEERS Criteria and wish to continue.

Current Protocol | Yes | No |

Confirmation

(?) NIFEdipine is a CCB ANTIHYPERTENSIVE.
This patient is classified as ELDERLY (>/=65 years old), and they are over the clinical threshold of 70 years old with this medication since their age is 70 years old.
Avoid immediate release nifedipine in the elderly due to potential for hypotension and the risk of precipitating myocardial ischemia.

To view additional information click the 'Yes' in the BEERS section below.

To cancel this order, click 'No' and unselect order.

I have reviewed the BEERS Criteria and wish to continue.

Updated Protocol | Yes | No |

Current vs Updated Geriatric Alerts Pop Up Message (Example #2)

Confirmation

(?) >>> BLACK BOX WARNING<<<
This drug is an ANTIPSYCHOTIC.
This patient is classified as ELDERLY (>/=65 years old) since their age is 70 years old.
ANTIPSYCHOTICS are not FDA approved for the treatment of dementia-related psychosis in geriatric patients due to increased risk of stroke and mortality.

To view additional information click the 'Yes' in the BEERS section below.

I have reviewed the BEERS Criteria and wish to continue.

Current Protocol | Yes | No |

Confirmation

(?) >>> BLACK BOX WARNING<<<
haloperidoL is an ANTIPSYCHOTIC.
This patient is classified as ELDERLY (>/=65 years old) since their age is 70 years old.
ANTIPSYCHOTICS are not FDA approved for the treatment of dementia-related psychosis in geriatric patients due to increased risk of stroke and mortality.

To view additional information click the 'Yes' in the BEERS section below.

To cancel this order, click 'No' and unselect order.

I have reviewed the BEERS Criteria and wish to continue.

Updated Protocol | Yes | No |

The following verbiage changes were made to the Geriatric Alerts (BEERS Criteria) protocols pop up message in OM:

1. **Replaced** "This drug" with the name of the actual medication. This clarifies which drug is triggering the pop up message, especially if there are multiple meds in the same drug class being ordered at the same time (i.e. pre-checked orders in order sets).

2. **Added** verbiage **"To cancel this order, click 'No' and unselect order."** Helps to streamline workflow if providers want to remove/cancel order after reading pop up message contents.
